Period : 12/2019 – 02/2020

Project: WEB Application for Parking Services

Project role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the web application HTML/CSS/BOOTSTRAP/JavaScript,
- Back-end programming in PHP
- Creating functionalities,
- Developing in PHP Environment Software: NET Beans IDE 8.3 & Database: MySQL

Period : 11/2019 – 01/2020

Project: Android Application for the Museum of Batinska Bitka

Customer: Muzej Batinske Bitke, Sombor

Industry: Tourism Project

Project role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the android application; creating layouts,
- Back-end programming in Java
- Creating functionalities,
- Developing in Java Environment in Android Studio Software: Android Studio

Period : 08/2019 – 11/2019

Project: WEB Application for Architectual Studio – Rebel Architects

Customer: Rebel Architects, Budva, Montenegro

Industry: Architecture

Project role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the web application HTML/CSS/BOOTSTRAP/JavaScript,
- Back-end programming in PHP – creating functionalities,
- Developing in PHP Environment

Software: NET Beans IDE 8.3

Reference: <http://rebel-architects.com/>

Period : 06/2019 – 08/2019

Project: WEB Store Application

Role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the web application HTML/CSS/BOOTSTRAP/JavaScript,
- Back-end programming in Angular TypeScript – creating functionalities,
- Developing in Angular Environment

Software: Microsoft Visual Studio Code

Period : 05/2019 – 07/2019

Project: WEB Application for Hotel room booking

Role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the web application HTML/CSS/BOOTSTRAP/JavaScript,
- Back-end programming in Java – creating functionalities,
- Developing in Java EE Environment

Software: NET Beans IDE 8.2

Period : 03/2019 – 05/2019

Project: WEB Application for a local library

Role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the web application HTML/CSS/BOOTSTRAP/JavaScript,
- Back-end programming in C# – creating functionalities,
- Developing in ASP.NET MVC Environment

Software: Microsoft Visual Studio

Period : 07/2018 – 09/2018

Project: Software Application: Creating service order

Role: Full Stack Developer

Department: IT

Tasks:

- Front-end design for the Windows Form App,
- Back-end programming in C# – creating functionalities,
- Developing in C# Environment

Software: Microsoft Visual Studio

Period : 06/2018 – 08/2018

Project: Information system design for a company

Department: IT

Tasks:

- Data-flow charts in Visio,
- Variety of diagrams in UML
- Designing data models within Business Intelligence area
